Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 24, 2005 has been entered.

DETAILED ACTION

This application is a continuation of 09/761,289, filed January 16, 2001, which is a continuation of 09/106,390, filed June 26, 1998, now US Patent 6,200,806, which is a divisional of 08/591,246, filed January 18, 1996, now US Patent 5,843,780, which is a continuation in part of 08/376,327, filed January 20, 1995, now abandoned.

Claims 1-11, 14-19 have been canceled. Claims 12, 13 and 20 are pending.

Obvious Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 12, 13 and 20 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 5,843,780 is withdrawn.

The terminal disclaimer filed November 1, 2004 has been received and accepted (see internal form entered December 1, 2004).

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The only remaining rejection of record was an obvious double patenting rejection which the terminal disclaimer filed November 1, 2004 has addressed. The claims are free of the art of record because the prior art fails to teach human embryonic stem cells with the disclosed properties. In particular, the present specification demonstrates that primate embryonic stem

cells are not responsive to the application of exogenous leukemia inhibitory factor as demonstrated for mouse embryonic stem cells. Further, the present specification is the first to demonstrate that the human embryonic stem cells are totipotent in that they have the capacity to differentiate and could potentially contribute to cells of the trophoblast and that these cell types produce chorionic gonadotropin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
